Abhay Choubey

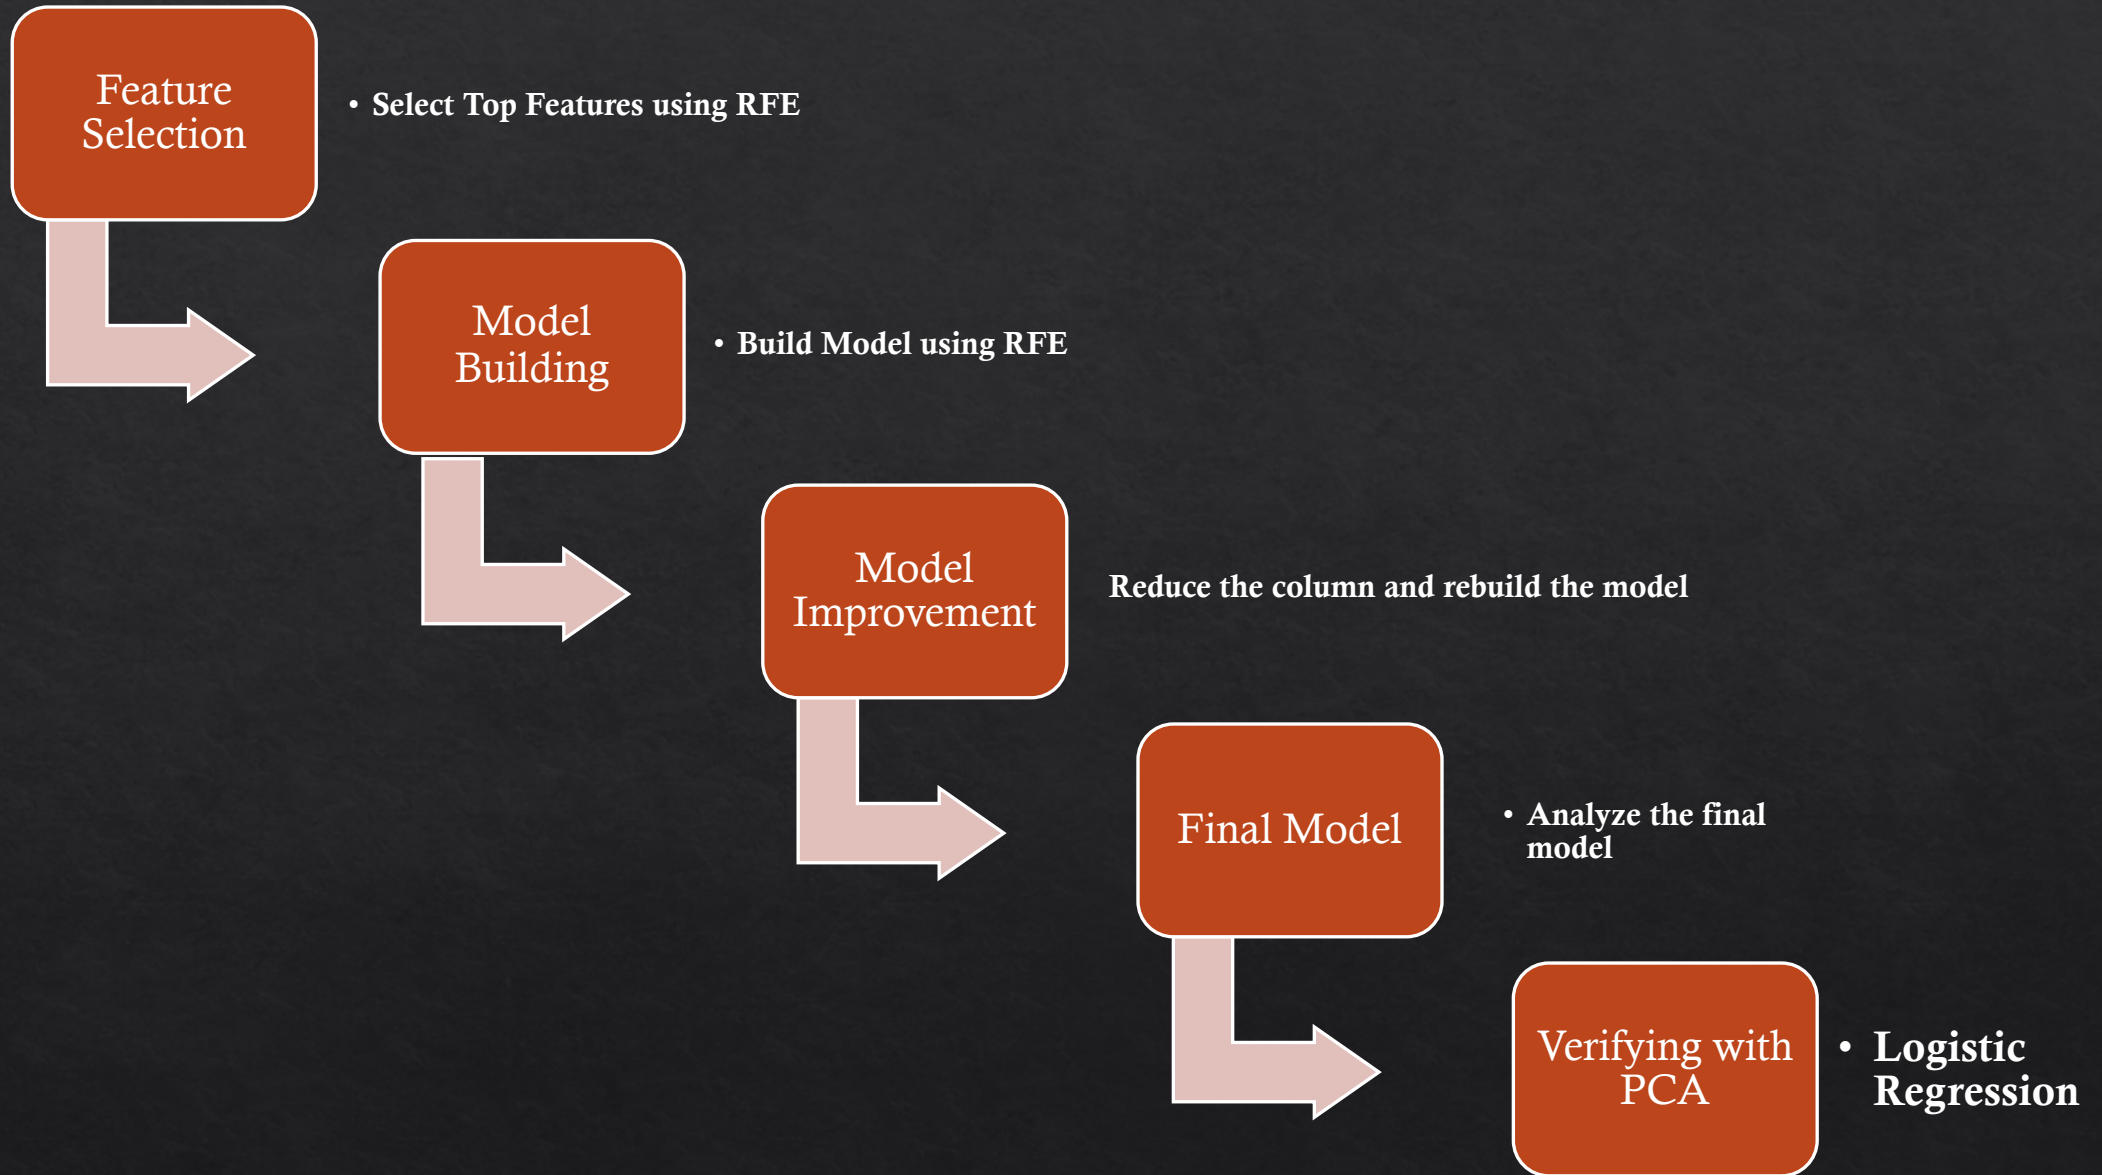

Solution

The main part of the solution is to accurately figure out the hot leads

The more accurately we figure out the hot leads, the probability of getting a conversion ratio is high.

Process Implementation

Plots Visualization

Converted EDA Plot

Last Activity for those who Converted and those who didn't.

A free copy of Mastering The Interview for those who
Converted and those who didn't.

Lead Source for those who Converted and those who didn't.

Last Notable Activity for those who Converted and those who didn't.

EDA plots with Heat Map of all selected numerical columns.

Final Linear Regression Model Parameters

ROC Area = 0.86

Intermediate cut-off = 0.37
